DustFloc

A Natural Solution to Dust Control

DustFloc is a popular dust control agent. It is a blend of natural and organic polysaccharides. DustFloc binds the soil particles together to effectively reduce PM₁₀ Fugitive Dust. It provides dry and wet strength with reworking capabilities.

Key Characteristics:

- 100% environmentally safe and non-toxic.
- DustFloc is long lasting and works well with various soil types in various pH ranges.
- Easily disperses with very little agitation.
- Designed to be applied by Hydroseeders or Water Trucks
- When applied, DustFloc is active in the in the top 1 inch of soil and keeps the soil particles agglomerated.
- Can be blended with various fiber sources to provide good cover and adherence to soil.
- Provides Soil Erosion resistance against Wind and Rain.
- DustFloc is available in a dry powder form (medium to coarse).

DustFloc is a very versatile product when it comes to dust control *applications*:

- Construction Site
- Mining Sites
- Ore Piles
- Landfills
- Highway Banks
- Windmills
- Erosion Control on Slopes

Application Rates: Flat to 5:1 slopes: 60 lb/acre/1200 gallons of water
5:1 to 4:1 slopes: 80 lb/acre/1200 gallons of water
4:1 or steeper: 100 lb/acre/1200 gallons of water

Packaging: 50 lb. paper bags.
