

Increase mulch bonding and adhesiveness with
ProPlus Tackifiers, Soil Stabilization & Dust Control

FlocLoc™ (PAM) - Soil Stabilizer

3-lbs per acre - Available in a waterproof container!

FlocLoc meets or exceeds other
PAM Tackifiers!

FlocLoc is a flocculating soil stabilizer containing an anionic linear polyacrylamide (PAM) designed to coagulate suspended soil particles, dropping them from runoff.

Reducing soil erosion and improving water infiltration into the seedbed.

FlocLoc™ is designed to:

- > One 3lb jug will provide temporary stabilization up to 1 acre
- > Dewater the hydroseeding slurry
- > Improves water holding capacity
- > Improves machine performance, high viscosity slurry improves shooting distance and suspension of seed and fertilizer
- > Increases water infiltration rates into the seedbed
- > Reduces sediment displacement
- > FlocLoc can also be used for temporary erosion control and dust control
- > Easy containers to handle and use

Application Rates:

Soil Stabilizing: 4.5lbs per acre

Product Contents - Properties:

Polyacrylamide (PAM)
pH Range: 6.8 +/- .2

Viscosity (Brookfield): 1950 CPS, 20 RPMS

*Based on .5% solution, mixed for 15 minutes and then evaluated for viscosity #2 spindle

Typical Application Rate:

Fiber Mulch Binding: Moderate to 4:1 Slope - 3lbs per acre

Packaging:

6-3lb jugs per case - 54 cases per pallet
40lb pail - 36 pails per pallet

FlocLoc- Pounds Per Tankload (Using 3lbs per Acre)

300 gallon	500 gallon	900 gallon	1500 gallon	3000 gallon
0.3 lbs	0.5 lbs	1 lbs	1.5 lbs	3 lbs
